Having macaques in the market square makes Marrakech a more lively and interesting place
Having this many macaques in the market square is a threat to the survival of the species
Macaques in the market square could be harmful to the health or safety of tourists
Marrakech would be a better place if the use of macaques in photo opportunities was banned
It should be illegal to keep macaques for photo opportunities
I would not recommend Jemaa El Fna to a friend because of the use of macaques in photography
