

# INTERCONNECT

## Interconnection Between Short- and Long-Distance Transport Networks

DELIVERABLE D5.3

## MODELLING MODULE FOR INTERCONNECTIVITY

---

Due Date: 30 April 2011  
Submitted: 5 May 2011  
Main Author: Mcrit  
Dissemination: Public

Project co-funded by the European Commission within the Seventh Framework Programme, Theme 7 Transport  
Contract number 233846

Project Start Date: 1 June 2009, Project Duration: 24 months

## Document Control Sheet

<b>Project Number:</b>	019746		
<b>Project Acronym:</b>	Interconnect		
<b>Workpackage:</b>	WP5 – Comprehensive Analysis at EU Scale		
<b>Version:</b>	V1.0		
<b>Document History:</b>	<b>Version</b>	<b>Issue Date</b>	<b>Distribution</b>
	V1.0	5 May 2011	Consortium, Project Officer

<b>Classification – This report is:</b>									
Draft		Final	X	Confidential		Restricted		Public	X

<b>Partners Owning:</b>	All
<b>Main Editor:</b>	Andreu Ulied, Oriol Biosca (Mcr)
<b>Partners Contributed:</b>	Ramon Català, Nati Franco, Efrain Larrea, Rafa Rodrigo (Mcr)
<b>Made Available To:</b>	All Interconnect Partners
<b>This document should be referenced as:</b>	Ulied A, Biosca O, Català R, Franco N, Larrea E, Rodrigo R, “Modelling module for interconnectivity” Deliverable D5.3 of INTERCONNECT, Co-funded by FP7. TRI, Edinburgh Napier University, Edinburgh, May 2001

This document was created as part of the Interconnect project.

## TABLE OF CONTENTS

<b>EXECUTIVE SUMMARY.....</b>	<b>1</b>
<b>1 INTRODUCTION.....</b>	<b>2</b>
1.1 APPROACH.....	2
1.2 OVERVIEW OF INTERCONNECT TASK T5.2.....	2
1.3 OBJECTIVES.....	4
1.4 PROBLEMS WITH INTERCONNECTIVITY .....	5
1.5 PROBLEMS WITH MULTI-MODAL MODELLING.....	6
<b>2 GOING BEYOND THE STATE-OF-THE-ART .....</b>	<b>7</b>
2.1 BACKGROUND REFERENCE: THE TRANS-TOOLS MODEL.....	7
2.2 MULTI-MODAL MODELLING OPTIONS.....	10
2.3 BASIC CHALLENGES OF MULTI-MODAL TRANSPORT MODELLING.....	14
2.3.1 <i>How Multi-Modality Should Be Modelled</i> .....	14
2.3.2 <i>How the IC Module Responds to these Challenges</i> .....	16
<b>3 DEVELOPMENT OF A MULTI-MODAL GRAPH TO ANALYSE INTERCONNECTIONS.....</b>	<b>18</b>
3.1 OVERVIEW .....	18
3.2 STARTING POINT: THE TRANS-TOOLS GRAPHS.....	19
3.3 INCORPORATING TRANSPORT TERMINALS TO INTERCONNECT TRANSPORT NETWORKS.....	21
3.3.1 <i>Overview</i> .....	21
3.3.2 <i>Rail Stations</i> .....	22
3.3.3 <i>Ferry Terminals</i> .....	26
3.3.4 <i>Airports</i> .....	27
3.4 SERVICES AT FERRY AND AIRPLANE LINKS .....	28
3.5 REFINING NUTS3 CENTROIDS.....	31
3.6 GENERATING CONNECTORS BETWEEN NETWORKS, AND WITH CITIES.....	32
3.7 VALIDATION OF THE MULTI-MODAL GRAPH .....	36
<b>4 DEVELOPMENT OF THE IC MODULE .....</b>	<b>38</b>
4.1 OVERVIEW .....	38
4.2 SOFTWARE OF THE IC MODULE.....	39
4.3 INTERNAL PARAMETERS OF THE IC MODULE.....	41
4.3.1 <i>Costs of Travelling</i> .....	41
4.3.2 <i>Costs for Travelling with the Air Mode</i> .....	42
4.3.3 <i>Costs of Using Interconnections</i> .....	44
4.4 VALIDATION OF THE IC MODULE RESULTS WITH TRANS-TOOLS .....	44
4.5 HOW TO USE THE IC MODULE.....	54
<b>5 RESULTS.....</b>	<b>59</b>
5.1 MULTI-MODAL ASSIGNMENT EXAMPLES.....	59
5.2 WAYS FOR FUTURE IMPROVEMENT.....	63
<b>6 REFERENCES.....</b>	<b>64</b>
<b>APPENDIX 1 - RESULTS .....</b>	<b>65</b>
<b>APPENDIX 2 - IC MODULE VALIDATION.....</b>	<b>86</b>
<b>APPENDIX 3 - SOFTWARE .....</b>	<b>125</b>

## LIST OF FIGURES

Figure 1-1 WP5 Task 5.2 overview .....	3
Figure 1-2 Construction process of the multi-modal graph .....	4

**TABLE OF CONTENTS (Continued)**

Figure 2-1	General structure of TRANS-TOOLS .....	7
Figure 2-2	TRANS-TOOLS flow diagram .....	9
Figure 2-3	Classical four-step model scheme .....	11
Figure 2-4	The joint multi-modal approach.....	13
Figure 2-5	The extended classic approach .....	13
Figure 3-1	INTERCONNECT strategy to construct the multi-modal graph.....	18
Figure 3-2	TRANS-TOOLS road uni-modal graph .....	19
Figure 3-3	TRANS-TOOLS rail uni-modal graph.....	20
Figure 3-4	TRANS-TOOLS air uni-modal graph .....	21
Figure 3-5	Equipping rail networks with rail stations, step by step.....	25
Figure 3-6	Identification and incorporation of ferry links from TRANS-TOOLS road and rail networks .....	26
Figure 3-7	Incorporating airports into the multi-modal graph .....	27
Figure 3-8	Modelling airports as interconnected terminal nodes .....	27
Figure 3-9	Example of ferry services in the Adriatic.....	28
Figure 3-10	Example of ferry services in the Mediterranean .....	29
Figure 3-11	Example of ferry services in the Baltic.....	29
Figure 3-12	A service modelling approach for the air mode .....	30
Figure 3-13	Air service modelling in the IC graph .....	30
Figure 3-14	Refining position of NUTS3 centroids: from geometric centres to geographic locations. ....	31
Figure 3-15	Incorporating missing city centroids in the Balkans .....	31
Figure 3-16	Structure of connectors from cities and transport terminals to other transport networks .....	32
Figure 3-17	Zoom of the graph in Barcelona, Madrid, Milan, Frankfurt and Scotland, showing interconnections of networks (road, rail, air) .....	35
Figure 4-1	INTERCONNECT strategy to construct the IC Module .....	38
Figure 4-2	Applications of the BRIDGES technology since the late 90s.....	39
Figure 4-3	Air mode travel costs: regression of unitary costs against distance .....	43
Figure 4-4	Air mode travel costs: relation between $\alpha$ parameter and number of passengers .....	43
Figure 4-5	IC Module validation process structure.....	45
Figure 4-6	IC Module validation criteria.....	46
Figure 4-8	IC Module results' convergence to TRANS-TOOLS' along iterative validation .....	51
Figure 4-9	Error levels between IC Module results and TRANS-TOOLS' after validation .....	52
Figure 4-10	Error levels for different trip purposes after validation .....	52
Figure 4-11	IC Module: general view .....	54
Figure 4-12	IC Module: welcome screen.....	55
Figure 4-13	IC Module: OD Trip matrix selection control panel .....	55
Figure 4-14	IC Module: multi-modal parameters control panel .....	56
Figure 4-15	IC Module: computation selection control panel .....	57
Figure 4-16	IC Module: execution control panel .....	58
Figure 5-1	Traffic assignment example for business trips in the Mediterranean arch .....	59
Figure 5-2	Traffic assignment example for private trips in the Mediterranean arch.....	60
Figure 5-3	Traffic assignment example for commuters trips in the Mediterranean arch.....	61
Figure 5-4	Traffic assignment example for holiday trips in the Mediterranean arch .....	62

**LIST OF TABLES**

Table 2-1	Classification of multi-modal transport modelling approaches.....	12
Table 3-1	Limitations to connector creation in the graph .....	32
Table 3-2	Leipzig-Naples shortest path trip in IC multi-modal graph .....	36
Table 3-3	Leipzig-Uppsala shortest path trip in IC multi-modal graph .....	37
Table 3-4	Leipzig-Mérida shortest path trip in IC multi-modal graph .....	37
Table 3-5	London-Leipzig shortest path trip in IC multi-modal graph .....	37
Table 3-6	Vinnitsya-Leipzig shortest path trip in IC multi-modal graph.....	37
Table 4-1	Basic parameters for values of travel time in the IC Module .....	41
Table 4-2	Basic costs for terrestrial networks operation in the IC Module.....	42
Table 4-3	Basic costs for interconnections in the IC Module .....	44

**TABLE OF CONTENTS (Continued)**

Table 4-4	Errors between IC Module results and TRANS-TOOLS' .....	51
Table 4-5	Adopted values for IC Module multi-modal parameters after validation process .....	53
